Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/692,371	Applicant(s) DAVID ET AL.	
	Examiner YASIN M. BARQADLE	Art Unit 2456	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Applicant's arguments filed on May 18, 2009 have been fully considered and are deemed persuasive. The Finality of the previous action has been withdrawn.

- Claims 1-5 and 16-21 are presented for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 16-17 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated Saint-Hilaire et al US Patent No. (20050022131), hereinafter "Saint".

As per claim 1, Saint teaches a method to render a composition on a device (abstract) comprising the steps of:

 sending a create composition node packet for creating a composition (§ 0032 and abstract ¶);

Art Unit: 2456

sending at least one create resources packet to create resources for rendering the composition (§ 0032-0033 and abstract); and

sending at least one render update packet to create the composition (§ 0036 and § 0041 server sends motion commands (e.g. setMotion Vector, ImageMoveLine etc.) to update a graphical user interface displayed on the remote device).

As per claim 2, David teaches the method of claim 1 further comprising the step of sending a create render data resource packet to create a render data resource (§ 0032-033 and abstract).

As per claims 16-17, similar limitations addressed in claims 1-2 are included. Therefore, they are rejected with the same rationale.

As per claim 21, Saint teaches the method of claim 16 further comprising the step of sending a notification in response to receiving a command packet (§ 0041).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2456

Claims 3-5 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable in view of Saint-Hilaire et al US Patent No. (20050022131), hereinafter "Saint".

Saint teaches the invention as explained above including sending commands such as DrawImage, DrawFillBox, LoadImage, SetMotionVector etc. to a remote device. However Saint does not teaches sending a batch open packet, close/commit batch packet and/or release command. Given the teaching the motion commands of Saint where "the animation specified by the motion commands result in the remote device moving the image object from one location to another location, scaling the image object from a first scale to a second scale, and/or rotating the image object from a first orientation to a second orientation." (abstract), one ordinary skill in the art at the time of the invention would include sending a batch open packet, close/commit batch packet and/or release command to the system of Saint. One ordinary skill in the would be motivated to do so in order to be able to update a displayed GUI using one or more transmitted commands/packets.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
